

# Coinbase Wallet (iOS) Manual for PUC Client

2019.11.06.Ver.

You must care your PUC by yourself after receiving PUC.

After installing Coinbase Wallet, we strongly recommend you to store the key phrases in the safest methods and places, for example, on papers and keep them in different places where only you can remember.

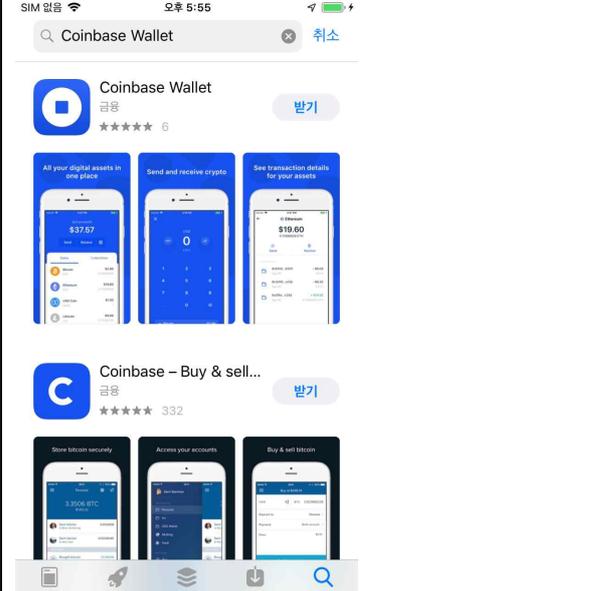

You consider the worst cases, lose your mobile phone or robbery

YOU CAN FIND HOW TO DO FROM STEP 13 TO 17, BELLOW

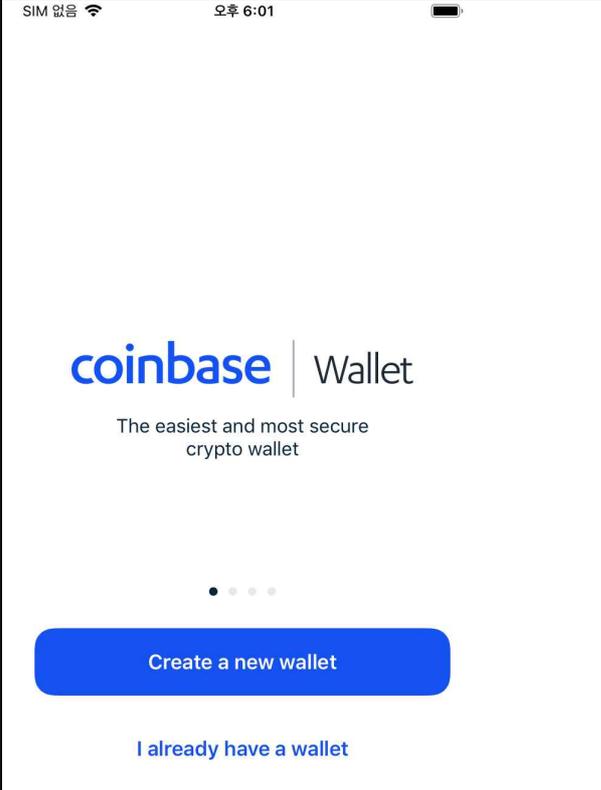

If you are already Coinbase Wallet user, you could use it, and do not care about this manual because you are already expert in Coinbase Wallet.

Please do not care about Korean language characters.

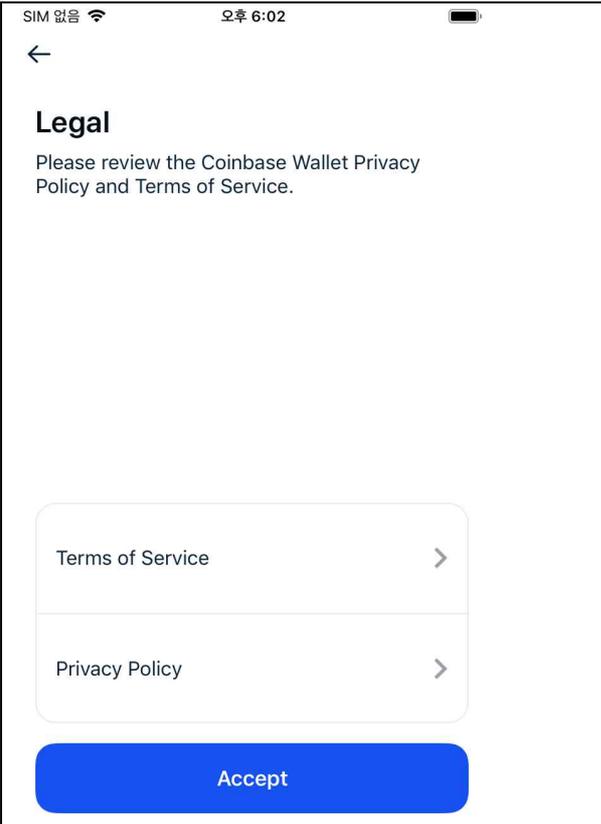

1.

	<p>Go to Apple Store in your mobile phone, and search "Coinbase Wallet". And then Install it.</p> <p>"Coinbase Wallet" is different and from "Coinbase"</p>
---	---

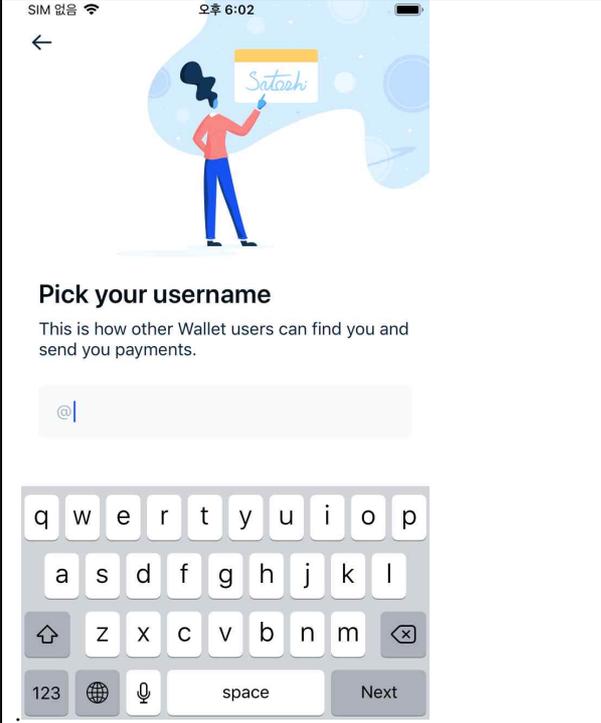

2.

	<p>After installing, open the Coinbase Wallet or click it.</p>
--	--

--	--

9.

	<p>Now, in your wallet, there is not any cryptocurrency, coins or tokens.</p> <p>To receive our PUC token, you have to know the wallet address, click the "Receive" menu (icon).</p>
---	--

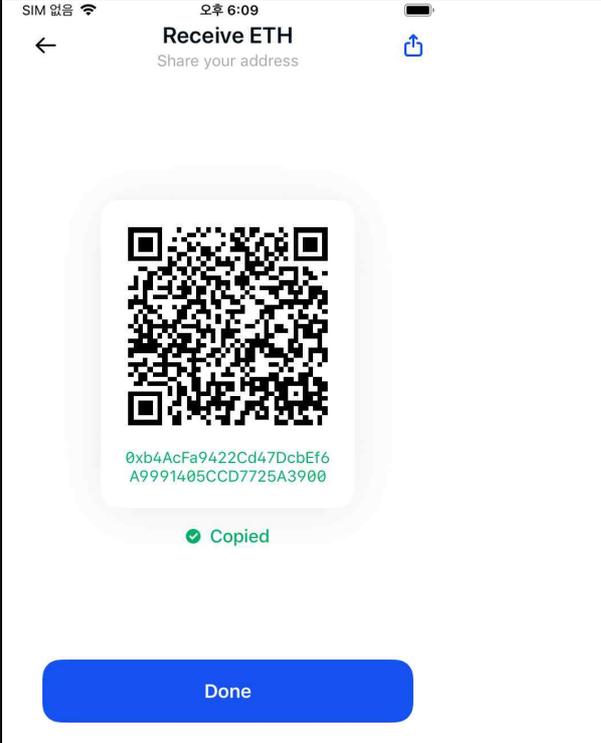

10.

 <p>The screenshot shows the 'Receive' screen of a mobile wallet application. At the top, there is a status bar with 'SIM 없음', signal strength, Wi-Fi, and the time '오후 6:09'. Below the status bar, there is a close button (X) and the title 'Receive' with the subtitle 'Select a coin'. A search bar labeled 'Search coin' is present. Underneath, there is a 'Suggested' section with three items: Bitcoin BTC, Ethereum ETH, and USD Coin USDC. Below that is an 'All coins' section with four items: WETH WETH, XRP XRP, Bitcoin Cash BCH, and Litecoin LTC.</p>	<p>There are many cryptocurrencies, you have to select the "Ethereum ETH" menu (icon and click it).</p> <p>For your information, PUC is created and based on Ethereum (ETH) blockchain system.</p>
---	--

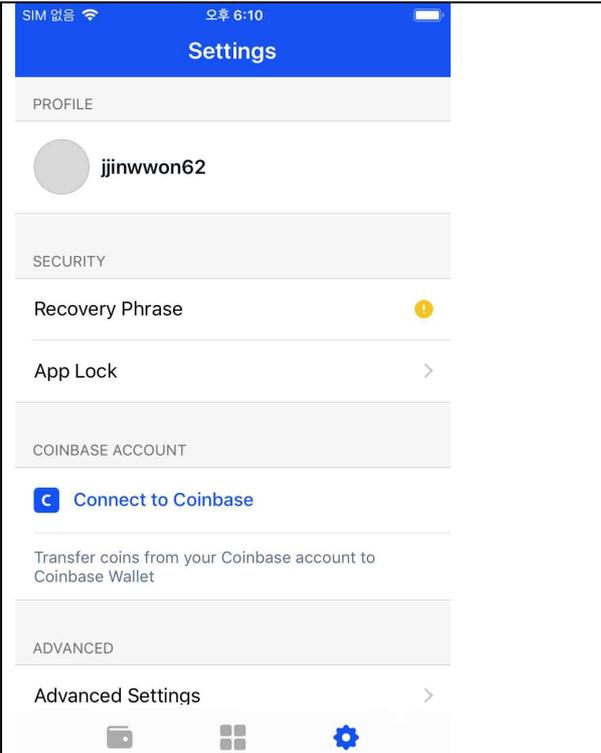

11.

 <p>The screenshot shows the 'Receive ETH' screen of a mobile wallet application. At the top, there is a status bar with 'SIM 없음', signal strength, Wi-Fi, and the time '오후 6:09'. Below the status bar, there is a back arrow, the title 'Receive ETH', and the subtitle 'Share your address'. A share icon is visible in the top right corner. The main content is a large QR code. Below the QR code, the wallet address is displayed: '0xb4AcFa9422Cd47DcbEf6A9991405CCD7725A3900'. Below the address, there is a blue 'Copy' button. At the bottom of the screen, there is a large blue 'Done' button.</p>	<p>You can find wallet address to receive PUC. It is created and made by Coinbase Wallet, automatically.</p> <p>You would be better to note this wallet address to share with sender, later.</p> <p>Click "Copy" menu (icon) to send to someone immediately.</p>
--	--

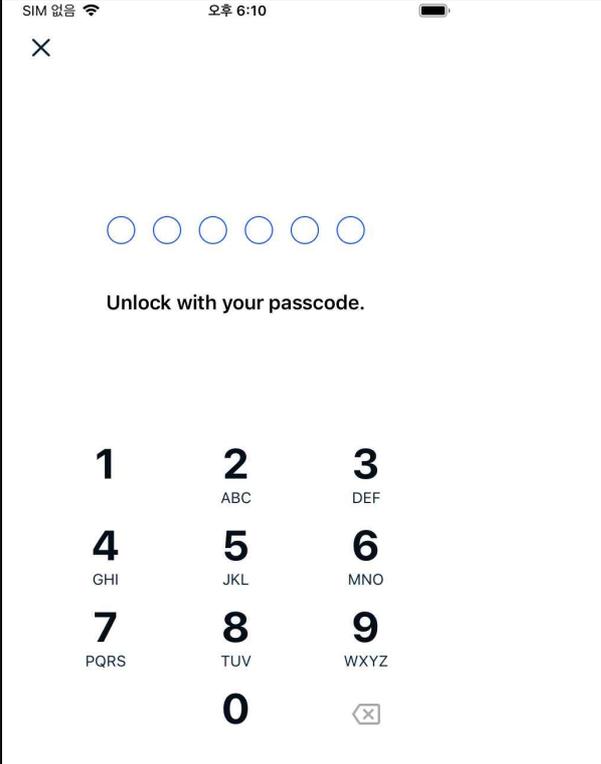

12.

 <p>The screenshot shows a mobile application interface for receiving ETH. At the top, it says "Receive ETH" and "Share your address". A QR code is displayed in the center, with the address <code>0xb4AcFa9422Cd47DcbEf6A9991405CCD7725A3900</code> below it. A green checkmark and the word "Copied" are visible under the address. At the bottom, there is a blue button labeled "Done".</p>	<p>There is "Copied" sign, now, you have the complicated wallet address in your mobile phone's clipboard, and then you can send and share to attach it in the any apps to someone.</p> <p>When you apply to PUC project's airdrop event, you could send this to our PUC project team by official email or SNS account.</p>
--	--

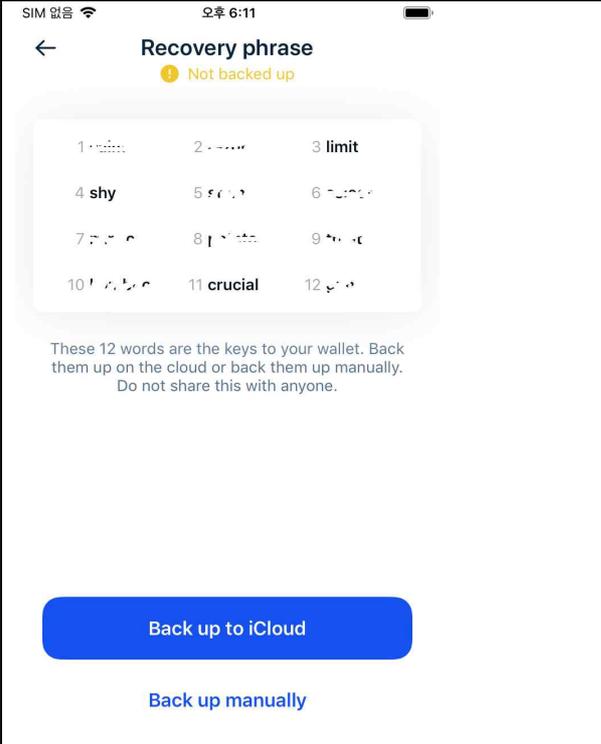

13.

 <p>The screenshot shows the "Settings" menu of a mobile application. The menu is organized into sections: "PROFILE" with a user name "jjinwon62"; "SECURITY" with options for "Recovery Phrase" (marked with a yellow exclamation mark) and "App Lock"; "COINBASE ACCOUNT" with a "Connect to Coinbase" button; and "ADVANCED" with an "Advanced Settings" option. A gear icon for settings is visible at the bottom right of the screen.</p>	<p>At most bottom and most right side, you can find the Setting menu (toothed-wheel icon), click it.</p> <p>And then, I will find SECURITY -&gt; Recovery Phrase, click the "Recovery Phrase" menu (icon).</p>
---	--

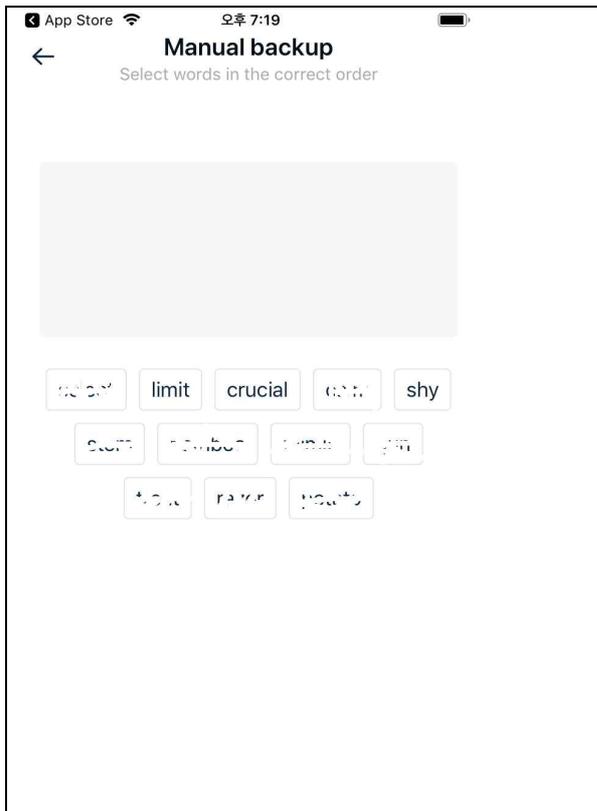

14.

	<p>You will be asked to type in your Passcode, then you type in your Passcode.</p>
--	--

15.

	<p>You can see the unique 12 phrase words for only your wallet address. <i>(Intentionally, erased all except 3,4,11)</i></p> <p><i>You have to match the order number and phrase, both, one by one.</i></p> <p><i>You can Back up to iCloud, but we recommend you Back up manually.</i></p> <p><i>Write down the order number and phrase word, one by one on the paper.</i></p>
---	---

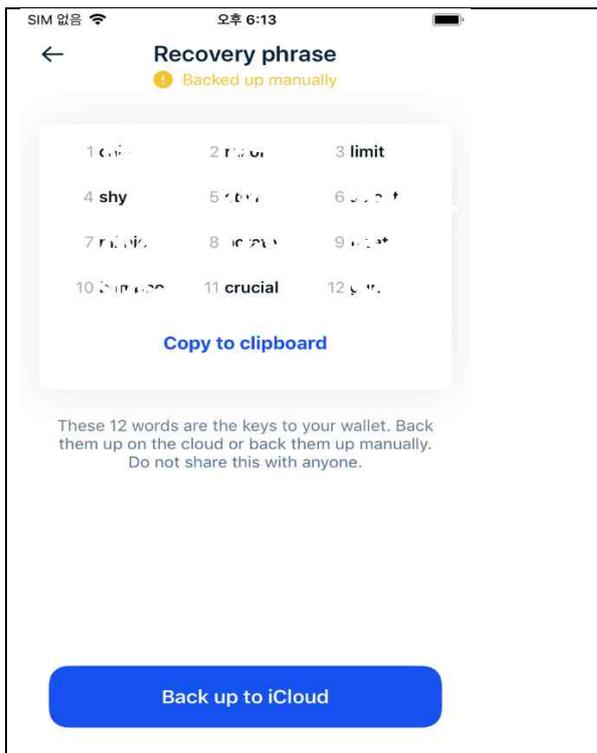

16.

You have to click the phrase words according to the order you have already wrote down on the paper.

If the order to click is changed, there will be occurred error.

17.

When you are correct in the order of all phrase words, you can see the "Backed up manually".

Now, your Coinbase Wallet for PUC token is safe even though you lose your mobile phone or robbery.

Anytime, you can revive your wallet after installing Coinbase Wallet again.

"Back up to iCloud" is your option
